九州大英語　第10講　解答

＜解答例＞

1.

I think it is necessary for Japanese students to go to cram schools. It is true that cram schools make students tired and are high in cost. However, there are many advantages for them.

First, going to cram schools means that students study more time. It certainly means a good thing, so students should go to them.

Second, smart students sometimes find their school classes easy, and so they regard their school as boring. However, they find cram schools classes difficult, and so they regard cram schools as interesting.

For the above reasons, it is necessary for Japanese students to go to cram schools.（104 words）

2.

I would like to study law at university. Therefore, I choose the law departure. I would like to enter the law-school after graduation. After that, I want to become a lawyer.

This is because I want to help the weak in our society. For example, some innocent people are arrested, others suffer from the effects of environmental pollution. I hope to become a good lawyer and to help such people.

I am not moved by money and status, but by an ideal and justice.（84 words）

3.

I disagree with the death penalty. It is true that it may work as a prevention of crimes and a comfort of the victim's family. However, it is proven that the death penalty doesn't work as a prevention of crimes. In fact, some people commit a crime prepared for the death penalty intentionally. Also, it does not comfort the victim's family. It just creates a circle of murder.

In addition to the above opinions, there is a possibility of incorrect judgments. If the judge wrongly sentences the death penalty, he will kill the innocent.

Therefore, I disagree with the death penalty.（101 words）

4.

I think that one of the main causes of an aging society is the fall in birthrate. One of the reasons of the fall in birthrate is the society in which it is hard for women to work after childbirth. To improve the situation, we should make the society easy for women to work in after childbirth. For example, companies offer women and men longer child-care leave.

Another reason is that Japanese husbands do not do the housework cooperatively. Therefore, Japanese women hesitate to give birth. Japanese husbands should do it more cooperatively.（93 words）

Input Sheet

1	自由英作文の型	①	結論
		②	根拠
		③	譲歩
		④	例示・列挙
